

IAU Commission B1
Computational Astrophysics

★ ★ News Letter No.15 ★ ★

Mar. 20, 2023

Dear friends and colleagues,

The IAU is holding its general assembly in Cape Town next year and we at Commission B1 are gearing up for that event. We hope you also want to contribute to IAU activities and this commission's in particular.

Call for contributions -

This message is a call for contribution to the next newsletter that we want to send out at the end of the month.

We would like to include your input - about a specific paper related to computational astrophysics, or a meeting that is taking place later this year, or a workshop that you would like us (CB1) to support.

If that were the case, please find attached to this message a latex document (text file called template.tex) that you may edit by filling the fields with your new details: title, dates, summary of topics or url link can be given. You may convert the template to pdf format by joining the preamble.tex file to the template (and if that fails, no worries: we can figure out how to output the pdf in a sensible format).

ChalCA V meeting -

We are planning to hold the fifth edition of the ChalCA series of conferences, with a special focus on young researchers and with an on-line only approach. At present we hesitate to hold the meeting in early September or early November 2023. If you want to voice your preference, please visit the Google Form below and checkout which of the two sets of dates proposed seemed best suited to you.

<https://forms.gle/bcZ2PSr7tPJKmueP8>

Important date -

We would appreciate that you send your contribution no later than 27 March 2023 so that we can process the newsletter in time. Thanks !

With this, let us end by wishing you a happy computation - all the best,
Chris Boily
for the CB1 steering committee

Yours sincerely,

Members of the IAU Commission B1 Organizing Committee
